Definition of Personal Income

Personal income is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or unincorporated business, from the ownership of financial assets, and from government and business in the form of transfer receipts. It includes income from domestic sources as well as from the rest of the world.

Personal income is the income that is available to persons for consumption expenditures, taxes, interest payments, transfer payments to governments and the rest of the world, or for saving.

The data in this report have been adjusted for inflation into 2024 \$ using the: Consumer Price Index for All Urban Consumers: All Items.
